## Mark delivers a top service

**WITH more than half of new cars sales in Britain now being diesel, business is looking good for a Basingstoke common rail specialist.**

“Common rail is the term used for modern diesel engines,” explained Mark Hunt, proprietor of MH Autos, who said that diesel engines are 15 to 20 per cent more fuel efficient than the petrol equivalents.

Over the years, as technology has evolved, modern diesel vehicles are becoming increasingly complex.

But this is no problem for Mark, who has more than 20 years’ experience in the automotive industry.

He has run his own business M H Autos for 10 years and has a modern and well-equipped service centre at Unit 11, at Vickers Business Centre, Priestley Road.

Furthermore, for the past year and after some hefty investment, M H Autos is an approved Delphi Service Centre.

Using Delphi Corporation’s sophisticated diagnostic kits, Mark can pinpoint faults on all common rail systems.

His kit includes special tools to diagnose faulty injectors and high pressure pumps quickly and simply.

Delighted to have such prestigious backing, Mark said: “It’s a big company to team up with.”

He has the full technical support of the Delphi team and access to its comprehensive website, which has proved to be an extremely useful resource.

This means that Mark is able to keep pace with changing technology and confidently meet his customers’ ever-increasing needs.

Not only is he able to meet the challenge of common rail technology for Delphi systems, but for all other makes including Bosch, Siemens and Denso.

He is also able to provide his customers with substantial savings, often hundreds of pounds, by offering reconditioned parts through his technical partner PB Asher, who are diesel specialists based in Southampton.

Mark explained: “For instance, I’ve a vehicle that has been delivered to me because it won’t start because of a faulty high pressure fuel pump

“But instead of buying a new pump, I’ve told my customer that I can send the pump to PB Asher, who will overhaul and fix it, send it back to me, and I’ll put it back on the vehicle – and away it goes.”

Mark offers his services at competitive prices for all makes of domestic cars and light vehicles, new or old. And they don’t have to be diesels.

“We’re a full service repair and MoT centre for all types of cars,” said Mark, who also offers a mobile home service.
